

Protective Matting for Horse Stables

There are many things that can be made from recycled rubber, one use in Ireland is matting to cover hard surfaces including road crossings and yards in horse stables. See how a champion trainer uses rubber mats in his stable in Co. Carlow.

Tyre Modified Asphalt

Tyre Modified Asphalt is a high performance, sustainable material for roads, cycleways and car parks. Harnessing the durable and flexible properties of Tyre Modified Asphalt uses waste as a valuable resource and can extend the life of pavements and improve safety, provide better drainage, improve the grip of tyres and reduce noise
